ABOUT ME

I'm a product-minded backend engineer with deep expertise in Fintech and operations and team leadership. I excel in high-growth high-expectations environments and handle pre and post-product market fit software products.

EXPERIENCE

Back End Developer

Nutbank

Argentina

2020-2024

- Led a team of four engineers to build a 0-1 product feature that helped users onboard on our application without needing to deposit funds. This involved working with payment railways, onboarding product testing, and owning the entire product pipeline.
- Designed and developed a new microservices architecture that helped scale our backend services from a 100QPS / 1% failure rate service to a 1000QPS / 0.01% failure rate. This involved infrastructure work as well as hands-on internal libraries design.
- Worked alongside the product team to improve the onboarding experience at the company, increasing our sign-up rate by 15% with a downstream impact of 1.5MM/yr revenue.

Back End Developer

Mercat Libre

Argentina

2018-2020

- Worked in the MercatPago area in a multidisciplinary team with UX Writers and designers, project and product management and technical leadership in an Agile team organization. Shipped features that impacted more than 1 Million DAU.
- We developed product features for financial applications. Responsibilities include writing unit tests, testing applications, code reviewing, collaborating with product to refine features. The products and pipelines worked managed over 5 Million USD daily volume.

SKILLS

Skills: Golang, Python, Java, SQL, JavaScript, React, AWS

PROJECTS

MercadoCat.com

2019

Built an online platform to connect rescue shelters with pet-adopters. More than 100 pets adopted through MercadoCat

EDUCATION

University of Buenos Aires, Argentina

Software Engineering

2015-2018
